

MAGA's Infiltration Problem

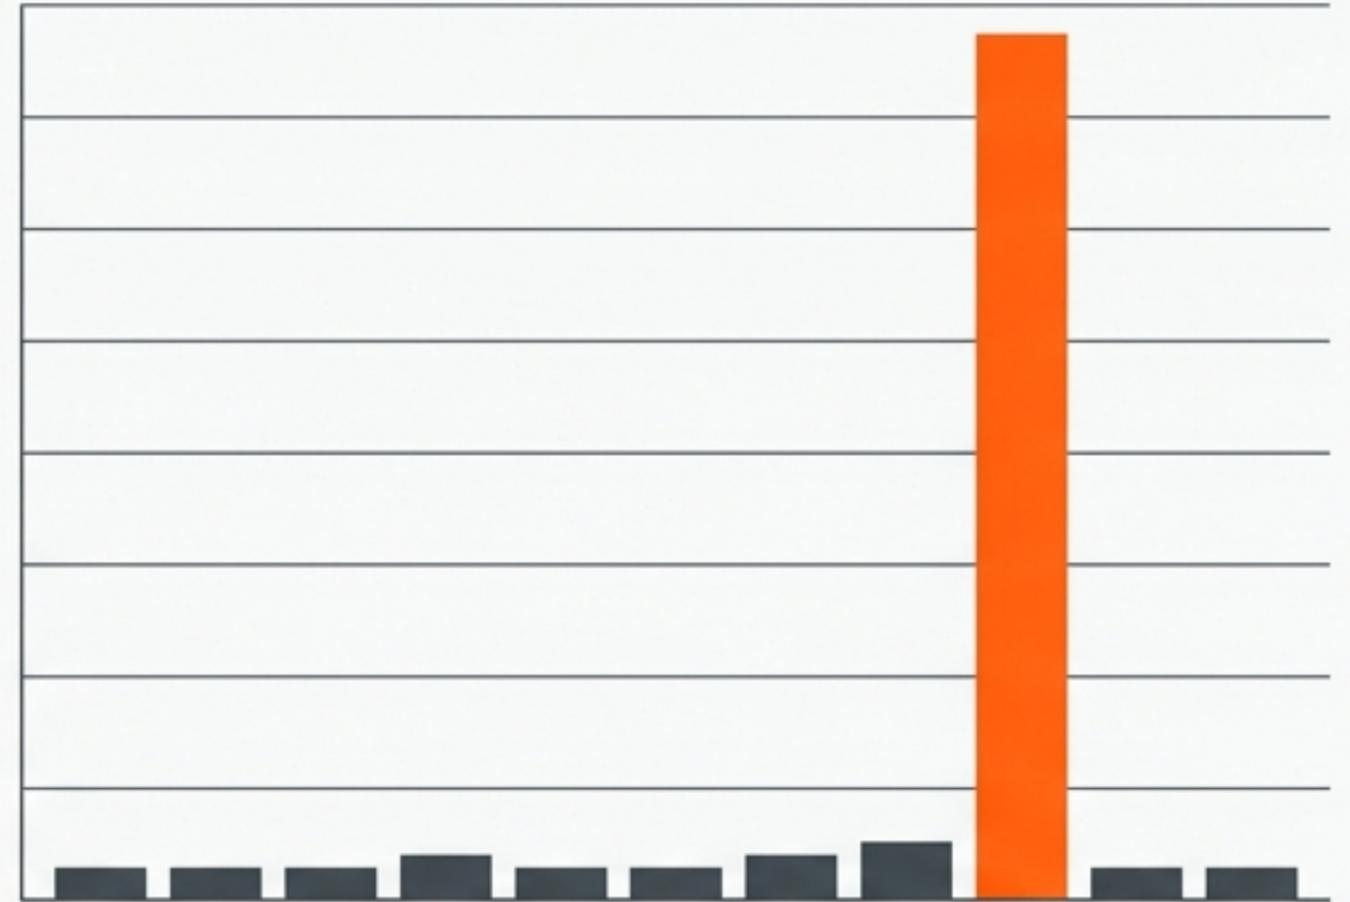

A 22-Month Threat Intelligence Dossier on Coordinated Network Operations

DATASET ORIGIN: OFFICIAL X API // SCOPE: MAY 2024 - MAR 2026 // ENGAGEMENTS: 3.1M

THE INCIDENT: JULY 2025

Targeted with a coordinated false narrative (labeled a “Mossad honeypot”) designed to isolate a U.S. Government official.

This level of media is isolating, unwanted, and unwarranted. But the data proved it wasn't a conversation. It was a weapon.

22 Months

May 2024 to March 2026 across 6 specific deployment chapters.

3,166,207

Total retweet engagements documented via official X API.

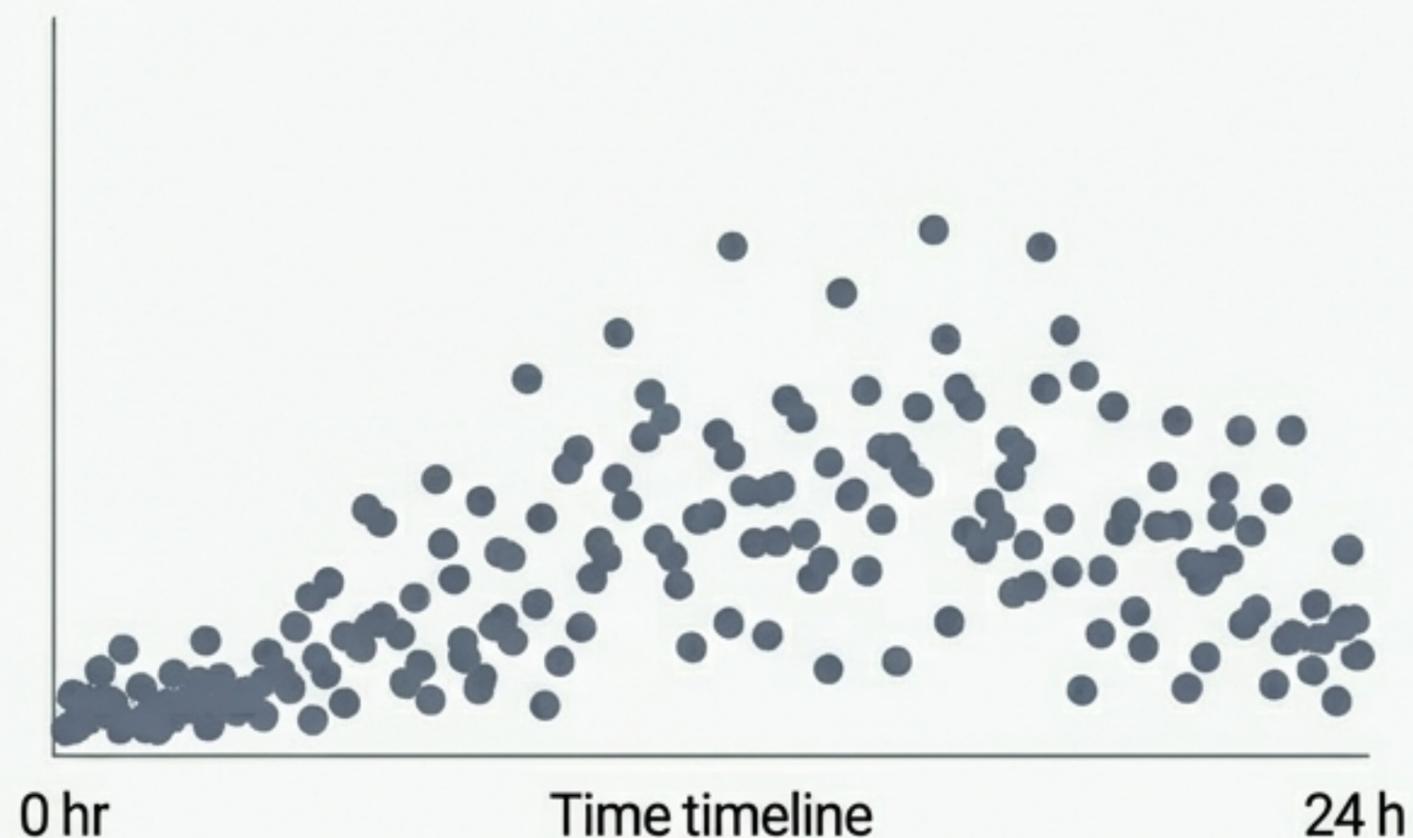

80%

Pure amplification rate—proving this is a distribution machine, not organic dialogue.

1 Single Network

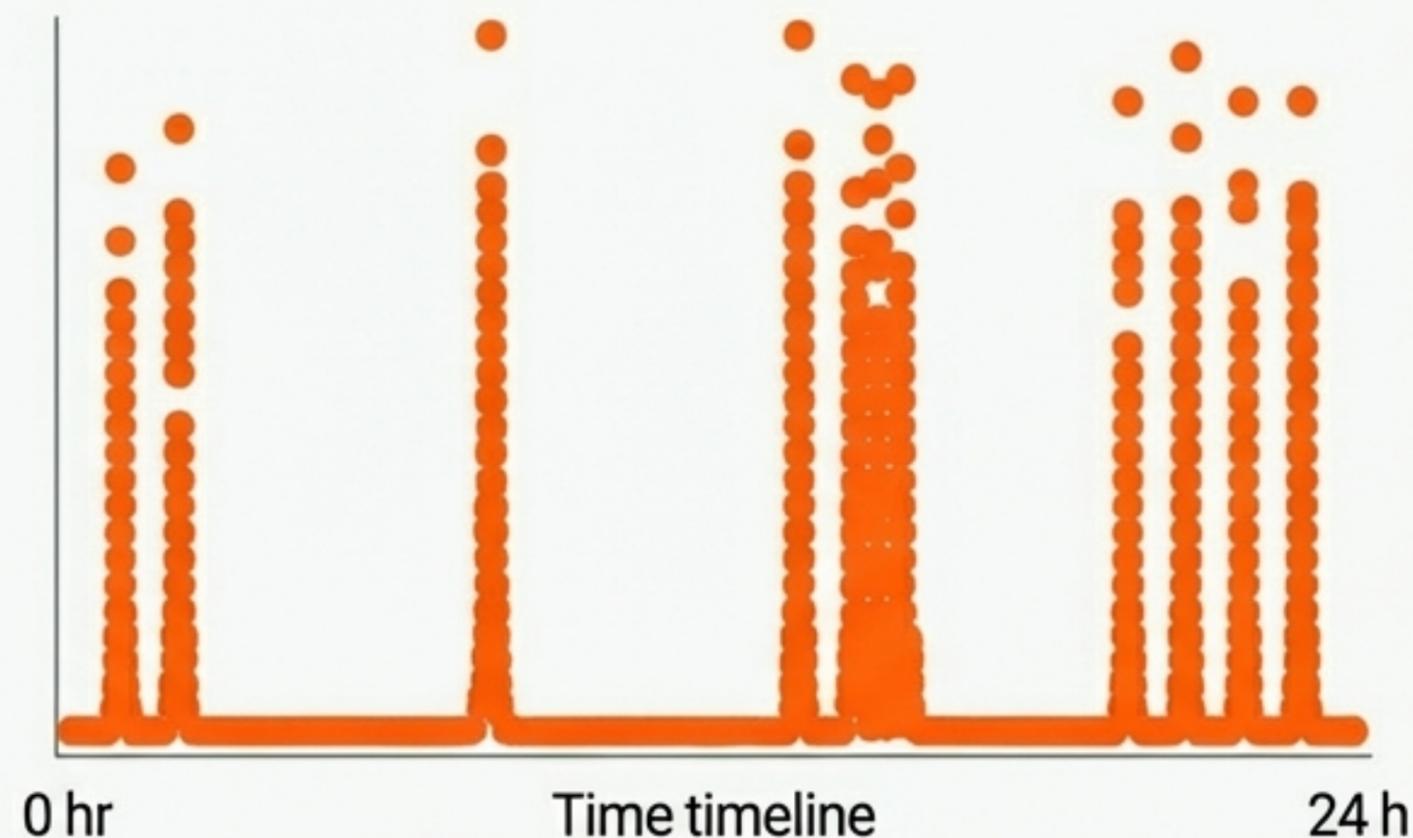

The same accounts appear at every fracture point. They do not rebuild; they stay dormant and ready.

Organic Spread

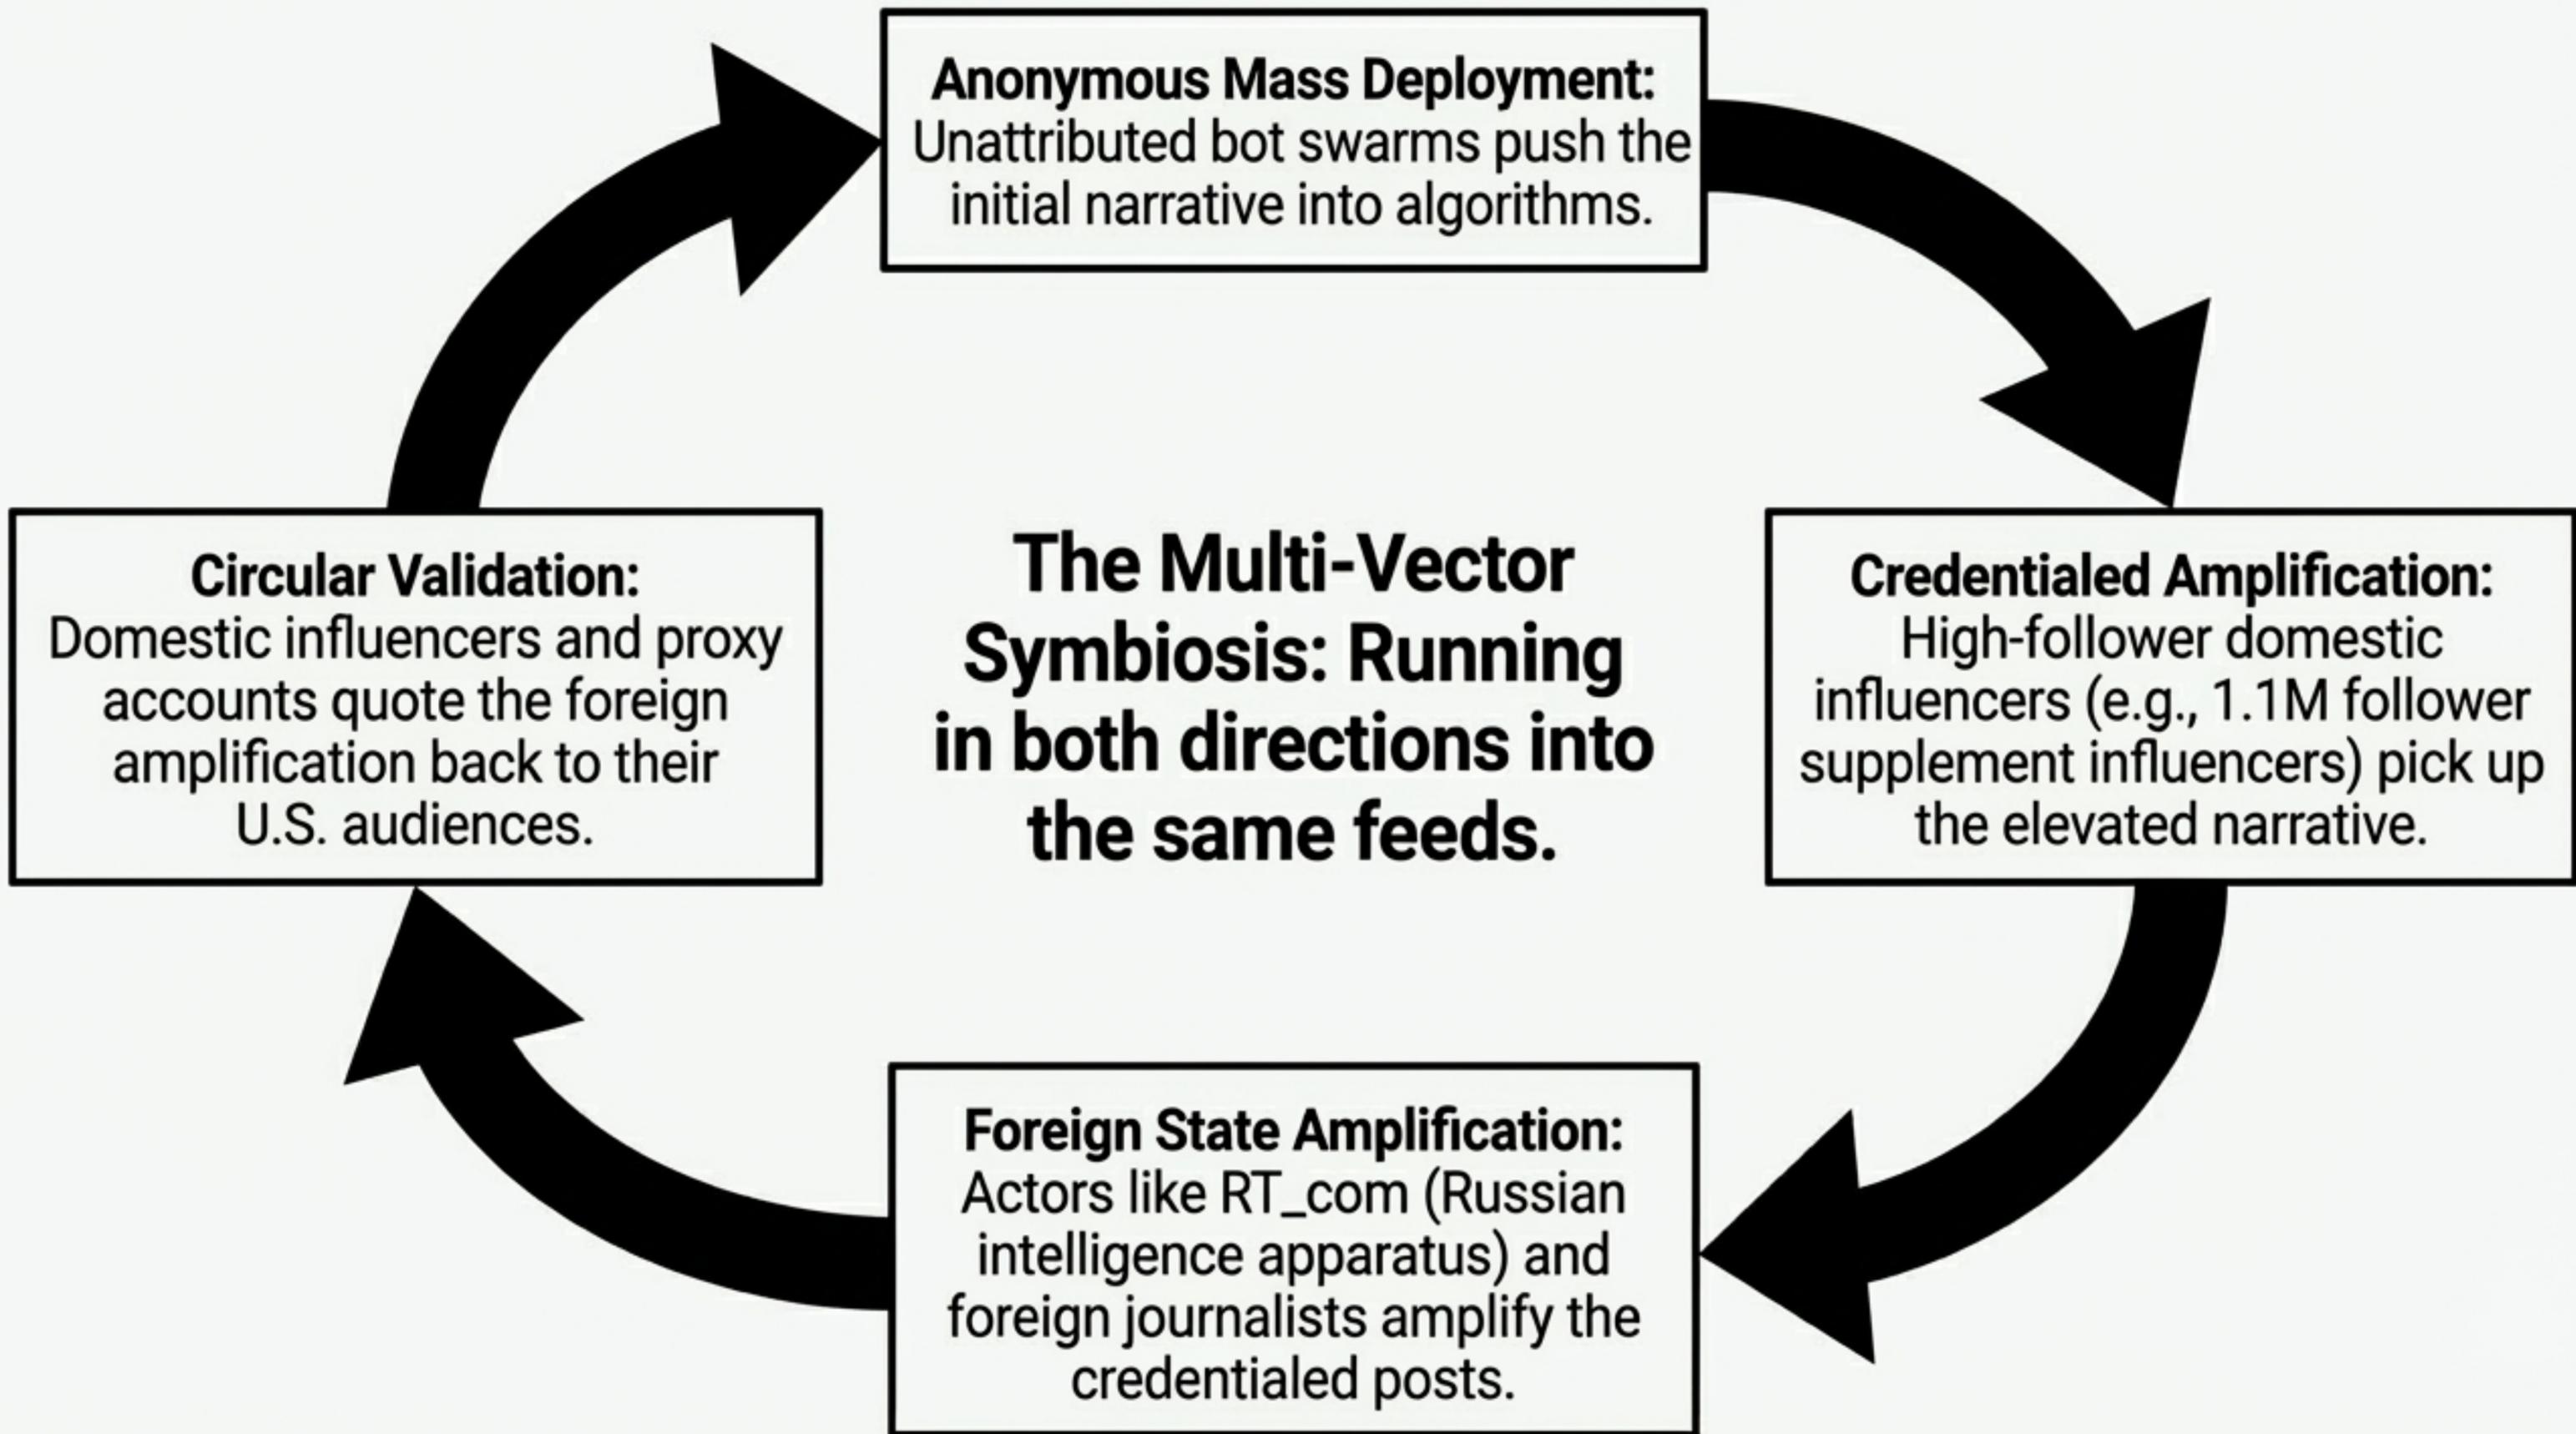

Organic Behavior: Timing is random. Users check feeds independently. Engagement curves build gradually.

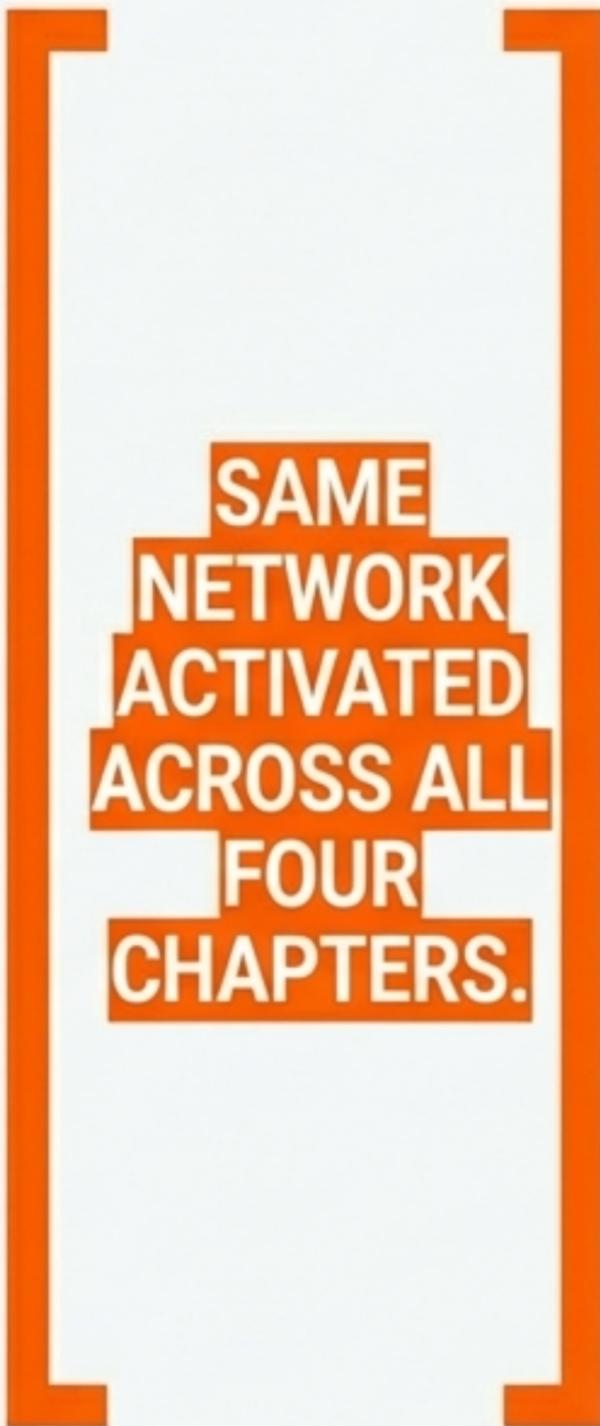

Weaponized Amplification

Network Signature: Simultaneous deployment. 659 accounts retweeting identically. 15 pairs retweeting within 10 seconds. 54 retweets in a single hour at peak. 14 tightly clustered time windows amplified within ONE SECOND.

People don't retweet the same post within seconds of strangers they've never met.

Date	Trigger Event	The Manufactured Narrative	The Desired Fracture	Network Status
May 2024	Pre-Butler	'Flynn would make Trump assassination-proof'	Cast doubt on institutional security.	 <p data-bbox="2715 778 3182 1360">SAME NETWORK ACTIVATED ACROSS ALL FOUR CHAPTERS.</p>
July 2025	The Honeypot	FBI Director's girlfriend is a Mossad spy	Isolate USGov officials.	
Sept 2025	Kirk Assassination	Blame Israel; target the widow	Convert natural Republican unity into severe internal fracture.	
March 2026	Kent Resignation	Anti-enlistment during active conflict	Institutional collapse and military division.	

Deployment 01: Pre-Positioning (May 2024)

ACTOR: Ivan Raiklin (Former DIA, Board Member of Flynn's "America's Future")

ACTION: Posts directly to @elonmusk & @JDVance1.

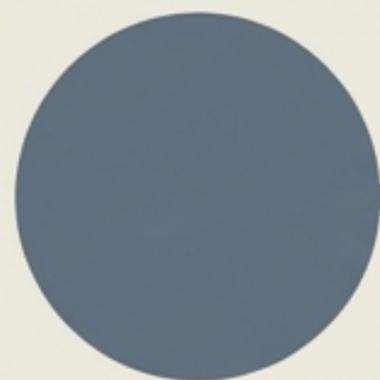

MESSAGE: "Gen Flynn would make Trump assassination-proof."

THE SIGNATURE: 166 retweets executed across 14 tightly clustered time windows, amplified within ONE SECOND of each other.

Butler Assassination
Attempt

Deployment 02: Targeted Isolation (July 2025)

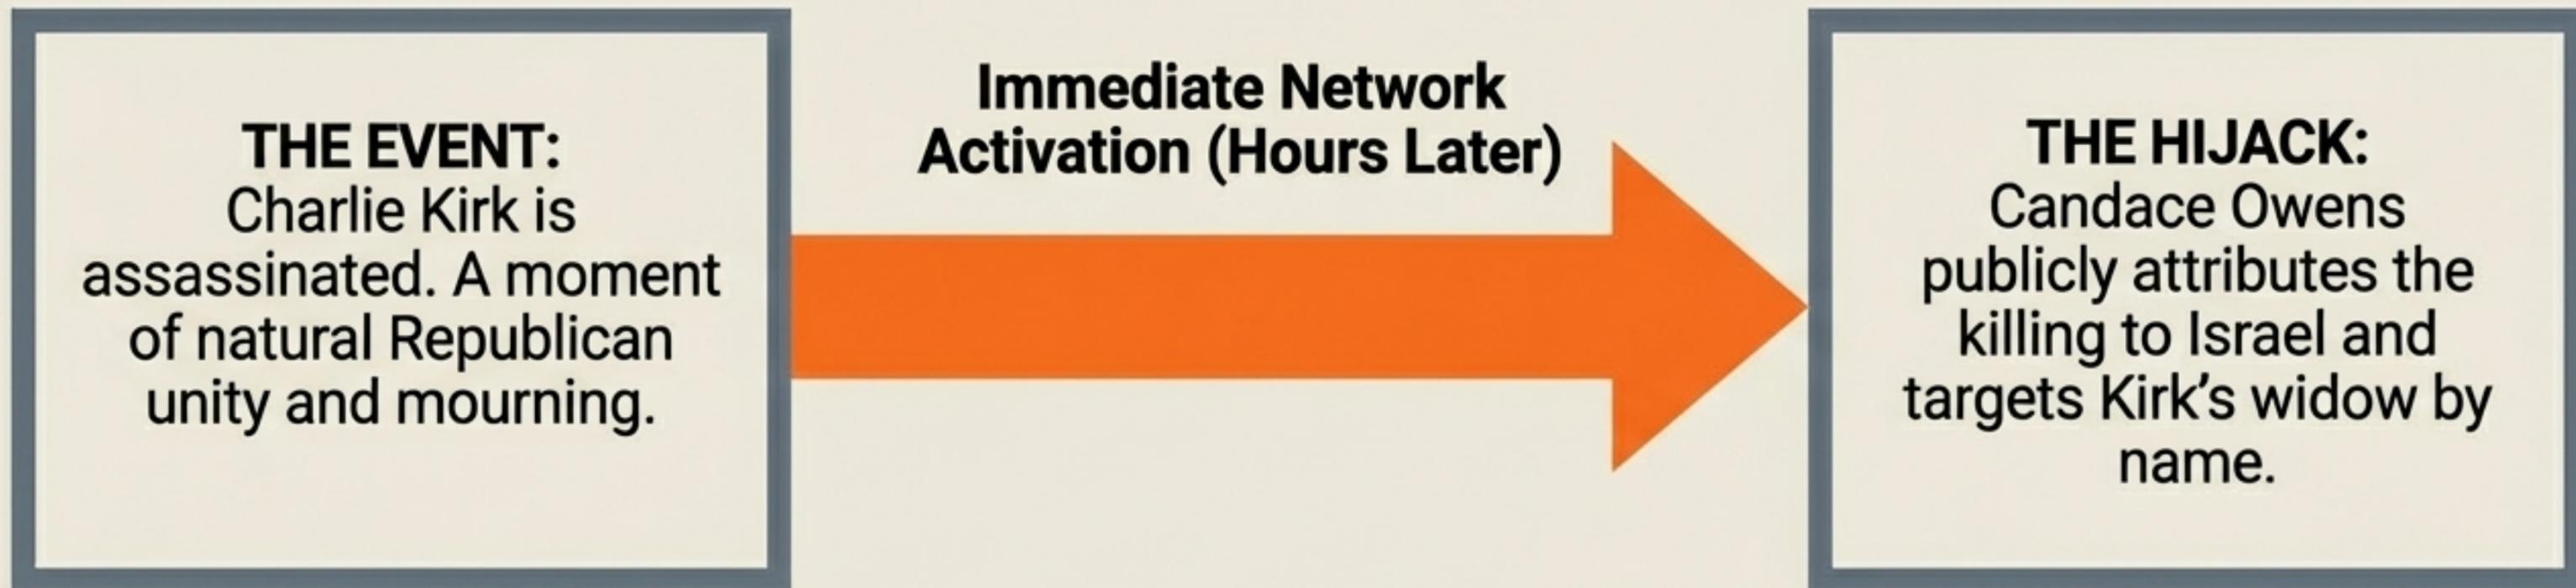

Origin: Supplement influencer (1.1M followers built via COVID medical freedom movement).

The Payload:
Coordinated false narrative identifying FBI Director's girlfriend as a Mossad honeypot.

The Velocity: Generated a labeled inorganic-seeming 20 Million Views. 863,568 total retweet engagements.

RT_com initiates amplification of the target by name, overlapping with the official Russian Ministry of Foreign Affairs.

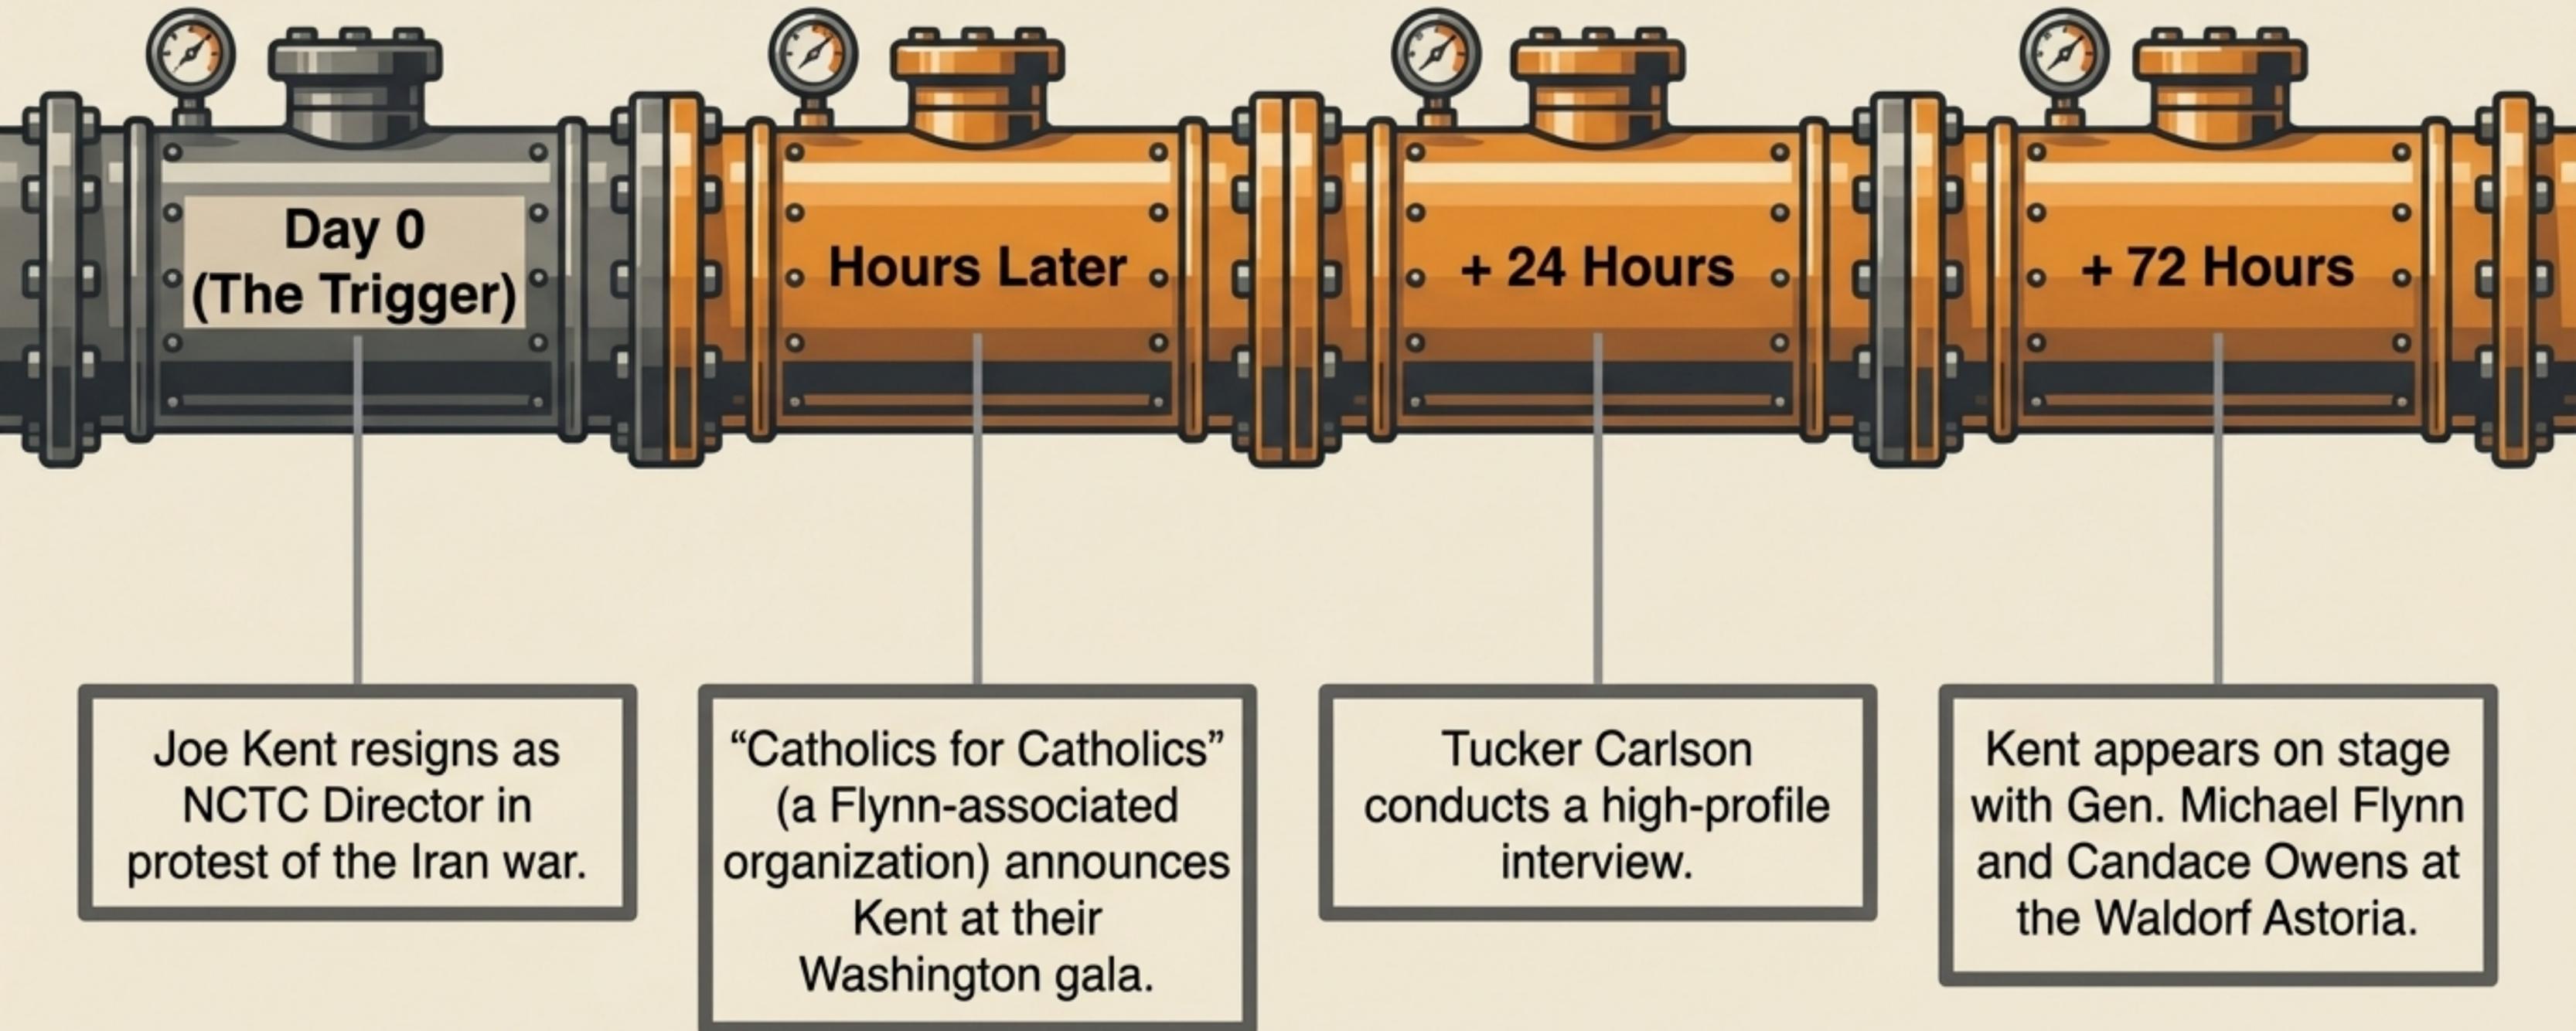

Deployment 03: Hijacking Grief (September 2025)

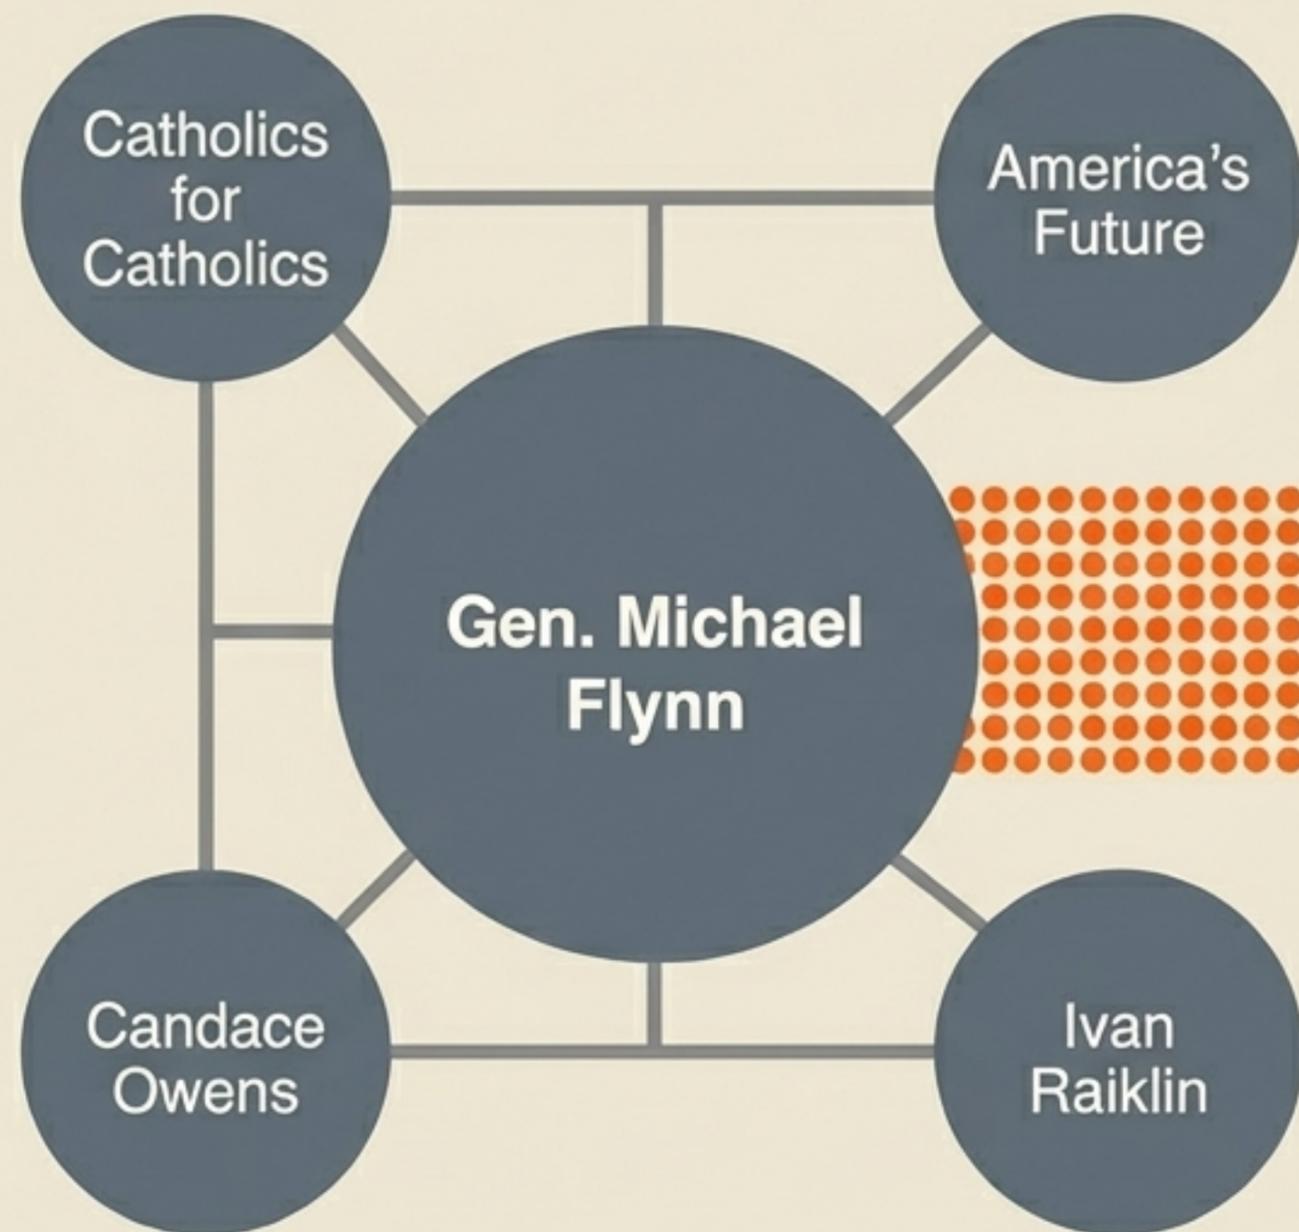

The exact same dormant accounts active in the July 2025 honeypot operation instantly activate to amplify Owens.

A moment of unity is forcibly converted into the most sustained fracture point of the year.

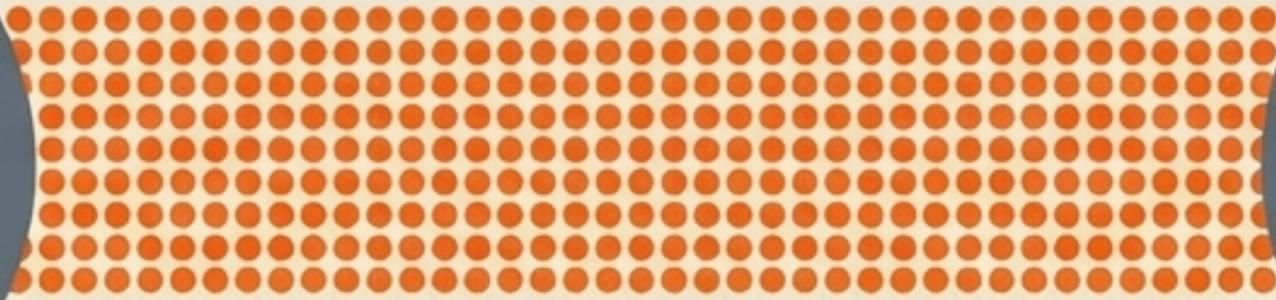

Deployment 04: The Media Pipeline (March 2026)

Domestic Anchor

Foreign Anchor

RT_com ranks in the top 15 amplifiers across the entire 22-month domestic dataset.

“Refuse to enlist in or remain fighting for the U.S. military.”

— Manufactured Network Message

“May American troops take his lead.”

— Candace Owens (Domestic Amplifier)

“MAGA is “more than dead, worse than dead, it’s now an undead, a ghoul.”

— Alexander Dugin via RT (Foreign Amplifier)

Distributed at scale during an active U.S. military conflict. Functionally anti-enlistment messaging, pumped simultaneously into the same feeds by both domestic fractures and foreign state media.

Threat Assessment: The Goal is Permanent Fracture

1

To Make the Movement Feel Over.

Convince Republicans their movement is dead and manufacture media that creates more problematic media.

2

To Demoralize the Military.

Make soldiers feel the war isn't worth fighting and paralyze enlistment.

3

To Destabilize Governance.

Make the government and its officials look fundamentally unstable through relentless isolation tactics.

The goal of this operation is not to win a political argument. Each chapter hits a different pressure point, but the network, the timing, and the Russian amplification remain consistent. That consistency is the signature.

MAGA doesn't have an approval problem. It has an infiltration problem.

The complete dataset—every account, every chapter, every documented overlap—will be published in full.
Everything is independently verifiable.

I am not saying anything, I ran data - I am asking you to draw your own conclusions.
